

Learning chords is probably one of the most basic parts of becoming an accomplished guitarist. In this journal, record all the chords you have mastered in class.

Do not simply copy the chord from the book or from a website! That's a total waste of time. When you can play the chord on demand, that's when you need to record the chord. Think of this as a list of what you've learned. You will have a minimum of ten chords by the end of the first semester, and over twenty by the end of the second.

Here is an example:

Chord Chart Standard Tuning
